Messages are presented in ascending Yahoo message-ID order. Gaps indicate records absent from the source WARC or messages omitted from this PDF as spam.

2. Winchester PARC net

Yahoo group: winparc
Date: 2008-03-02 18:10:54 UTC
From: Darrell
Topic: 2 Message: 2

The Winchester Pioneer Amateur Radio Net is held every Thursday night at 8:45 PM on the Winchester 145.430 MHz repeater. It has a negative offset and a PL of 203.5.

Also, be sure to use the 70 cm repeater. It can be found on 441.900 MHz with a positive offset and a PL of 203.5.

Please pass the word and try ro check in with us.

A heads up.

The copy of KRS 432.570 as distributed to this
Folks,

A heads up.

The copy of KRS 432.570 as distributed to this list was a copy of the bill that came before the 2000 General Assembly. The italicized sections indicate provisions were added covering volunteer fire fighters and the possession of weather radios. The heads up is that copy of a bill is not necessarily what was actually passed by the General Assembly and enrolled as a statute.

You should always check the text of statute as posted on the Legislative Research Council web site (lrc.ky.gov): see http://www.lrc.ky.gov/KRS/432-00/570.PDF. In this case, the text matches.

A review of the bill and enrolled text does bring up a question. If the secretary of the Finance and Administration issued an order exempting them (I don't know if that was done or not), paragraph 6 seems to authorize the possession and use of a scanner by any member of the general public as long as that scanner can receive N.O.A.A. weather radio broadcasts. Of course, I assume that the intent here is to apply this authorization in the case of mobile communications equipment. So, as long as anyone using a scanner in their vehicle can say, "It's my weather radio," and hits a button to receive a N.O.A.A. broadcast to demonstrate the feature works, what is the overall utility of KRS 432.570?

125. Repeater Frequency Lookup on the Web

Yahoo group: winparc
Date: 2011-09-30 00:38:08 UTC
From: Charles
Topic: 125 Message: 125

New or recently re-active hams might find this site useful. It's at http://www.artscipub.com/repeaters

Free to look up repeaters within 10 miles of any ZIP code. List freq, PL tone. etc. The rest of the site is pretty good too.

Tony, WD4OWB

129. Using your callsign as a second google gmail account

Yahoo group: winparc
Date: 2011-11-06 23:44:14 UTC
From: Charles
Topic: 129 Message: 129

Any of you that use an Android phone or have an existing google gmail account that doesn't already use your callsign, the link below is -excellent- step by step directions on how to create a second gmail account. I just now created my own secondary account, WD4OWB@... and it works perfectly:

http://www.google.com/support/forum/p/gmail/thread?tid=069c3da0aaecb9b5&hl=en

The second account can be managed entirely from within the primary gmail account. You can even send a reply that carries the address of the second account.

Now I have an email address I can dedicate to Ham Radio use!

Hi all

Gleaned from 73 magazine (September 1988)-
"
88 and 73
The numerals 88 and 73 have been a tradition in communication languages for almost 130 years. The older of the two, 73 appeared in 1853 meaning " My love to you ." In 1857. The first official definition made it a "fraternal greeting between operators." Two years later in 1859, Western Union made 73 a part of their "92 code" to indicate "Accept my compliments."

The final change came in 1895, when 73 meant " Best Regards" for the telegraph and later for radio, operators. 88 never received the formality of an official listing until it was adopted as one of the ham abbreviations. It had been one of the telegrapher operator's traditional terms since well before the turn of the century. During the First World War. 88 was used by the U.S. Army Signal Corps. again strictly as an operator's abbreviation in unofficial communications. But at the close of the First World War, 88 achieved official status as part of amateur radio terminology, " Love & Kisses.""
Best Regards\\

From: "Norman Harrill" <nharrill@bellsouth.net>
Date: September 4, 2013, 22:45:01 EDT
To: "WCARS/VEC_STAFF" <wcarsvec@...>
Subject: *2013 Gray Hamfest CANCELLED*

****

****

2013 GrayHamfest®
CANCELLED ****

The GrayHamfest® was the inspiration of Charlie Stuchell and a small group of hams desiring to return a hamfest to the Tri-Cities area after several years without one. Charlie, serving as the Chairman, has been the gentle force and smiling face in making the hamfest happen each year. ****

After an extended illness, we are saddened to report that Charlie passed away on Sunday, September 1 at about 05:30 a.m. ****

Charlie Stuchell (SK)
K4CWA ****

****

Over the years, Charlie was active in the leadership of several radio clubs in the Tri-Cities and was known throughout the region as a friend to many and a ready volunteer. Others, outside of Amateur Radio, knew him best as the drive-time traffic voice on local FM radio. He will be greatly missed by all of us. ****

** **

** **

The GrayHamfest® preparations for this year, without Charlie's contributions, had not progressed to the point of readiness that the Committee needed at this stage. The Committee met and unanimously voted to cancel the 2013 hamfest. This will allow as much advance notice as possible to inform the public and vendors. ****

Additionally, the Committee voted to close the books on the GrayHamfest® Association as a non-profit entity, to dissolve the organization, and to disband the current Committee from any future hamfests. So, once again in the Tri-Cities, another team will need to revive a hamfest in **Northeast Tennessee** *-* if they find that the desire exists to support it. ****

We want to sincerely thank all of you for your support during these years and especially for the volunteers that gave of their many non-paid hours to make it all possible. We regret any inconvenience or disappointment this may cause you, but feel it is the right decision at this time. ****

*The GrayHamfest® Committee *

k
KILROY WAS HERE

He is engraved in stone in the National War Memorial in Washington, DC-
back in a small alcove where very few people have seen it. For the WWII
generation, this will bring back memories. For you younger folks, it's a
bit of trivia that is a part of our American history. Anyone born in 1913
to about 1950, is familiar with Kilroy. No one knew why he was so well
known- but everybody seemed to get into it.

So who was Kilroy?

In 1946 the American Transit Association, through its radio program, "Speak
to America ," sponsored a nationwide contest to find the real Kilroy,
offering aprize <http://www.shangralafamilyfun.com/kilroywashere.html> of a
real trolley car to the person who could prove himself to be the genuine
article. Almost 40 men stepped forward to make that claim, but only James
Kilroy from Halifax , Massachusetts , had evidence of his identity.

'Kilroy' was a 46-year old shipyard worker during the war who worked as a
checker at the Fore River Shipyard in Quincy . His
job<http://www.shangralafamilyfun.com/kilroywashere.html>was to go
around and check on the number of rivets completed. Riveters were
on piecework and got paid by the rivet. He would count a block of rivets
and put a check mark in semi-waxed lumber chalk, so the rivets wouldn't be

counted twice. When Kilroy went off duty, the riveters would erase the mark.

Later on, an off-shift inspector would come through and count the rivets a second time, resulting in double pay for the riveters.

One day Kilroy's boss called him into his office. The foreman was upset about all the wages being paid to riveters, and asked him to investigate. It was then he realized what had been going on. The tight spaces he had to crawl in to check the rivets didn't lend themselves to lugging around a paint can and brush, so Kilroy decided to stick with the waxy chalk. He continued to put his check mark on each job he inspected, but added 'KILROY WAS HERE' in king-sized letters next<http://www.shangralafamilyfun.com/kilroywashere.html>to the che ck, and eventually added the sketch of the chap with the long nose peering over the fence and that became part of the Kilroy message.

Once he did that, the riveters stopped trying to wipe away his marks. Ordinarily the rivets and chalk marks would have been covered up with paint. With the war on, however, ships were leaving the Quincy Yard so fast that there wasn't time to paint them. As a result, Kilroy's inspection "trademark" was seen by thousands of servicemen who boarded the troopships the yard produced.

His message apparently rang a bell with the servicemen, because they picked it up and spread it all over Europe and the South Pacific.

Before war's end, "Kilroy" had been here, there, and everywhere on the long hauls to Berlin and Tokyo . To the troops outbound in those ships, however, he was a complete mystery; all they knew for sure was that someone named Kilroy had "been there first." As a joke, U.S. servicemen began placing the graffiti wherever they landed, claiming it was already there when they arrived.

Kilroy became the U.S. super-GI who had always "already been" wherever GIs went. It became a challenge to place the logo in the most unlikely places imaginable (it is said to be atop Mt. Everest , the Statue of Liberty , the underside of the Arc de Triomphe, and even scrawled in the dust on the moon.

As the war went on, the legend grew. Underwater demolition teams routinely sneaked ashore on Japanese-held islands in the Pacific to map the terrain for coming invasions by U.S. troops (and thus, presumably, were the first GI's there). On one occasion, however, they reported seeing enemy troops painting over the Kilroy logo!

In 1945, an outhouse was built for the exclusive use of Roosevelt, Stalin, and Churchill at the Potsdam conference. Its' first occupant was Stalin, who emerged and asked his aide (in Russian), "Who is Kilroy?"

To help prove his authenticity in 1946, James Kilroy brought along officials from the shipyard and some of the riveters. He won the trolley car, which he gave to his nine children as a Christmas gift and set it up as a playhouse in the Kilroy yard in Halifax , Massachusetts .

And The Tradition Continues...

EVEN Outside Osama Bin Laden's House!!!

My DVR, computer and phone change on their own, and that's enough. I never change my other clocks. I would just have to undo it in March. Is it worth it for 4 months? It's another ploy by the Illuminati to control the masses.

Let's all go back to standard time and stay there. The time is better spent changing smoke alarm batteries, checking fire extinguishers and preparing for TEOTWAWKI. You know, when TSHTF.

Thanks, Pete. You sent this today but I got it 9 days ago.

We have two items we would like to make you aware of this week.

The first bit of news is we will be at the Orlando HamCation Hamfest this coming weekend, February 7-9th. Stop by the Commercial 1 building booth 75 & 76 for a visit.

The second item is we are seeking to add to our existing sales team a Sales/Marketing Manager

Ten-Tec, Inc., seeks a sales/marketing manager who will be responsible for planning and executing the sales strategy for Ten-Tec's amateur product line.

The sales manager's primary responsibility is direct sales and customer support.

The sales manager also contributes to marketing, advertising and product development.

Manager may work remotely or from Ten-Tec headquarters in Sevierville, TN.

For 46 years, Ten-Tec Inc. products have set the standard for real-world performance
in the most rigorous and demanding applications. Our reputation in the industry for service and manufacturing quality is unmatched.

This is an excellent opportunity for a Ham to join a great company and earn a living doing what you love!

For a complete position description, please visit:
http://www.tentec.com/pages/employment.html.

To apply for this position, please email your resume in Word format to jobs@....

Hey you mean Ale 8 hater.

I don’t know how to get this out to the Winchester group, but my Echo Link PC will be down for a while. I’m switching internet and phone to Time Warner, mainly because it will save me 50 bucks per month. I used to be on TWC, and for some time I couldn’t get Echo Link to work with it. I know I have to do some port forwarding, and I’ll try to get that working. The dude who will be installing my internet is gonna have fun, because the PC that’s directly hooked to the modem doesn’t have a screen on it, and the one that does have a screen is my laptop, which uses WI-FI to connect. Guess I should call them and mention this. Who knows, maybe I can get a monitor out of the deal from TWC, maybe? Nah, probably not. Oh yeah, my email will also be changing, so I’ll send you a really nice note letting you know what it is. After all, I’m one of the nicest guys around.

Have a good day, don’t work too hard, and watch some basketball!

Oh yeah, I have some other news. Something nice has happened to me. It’s called a girl! Believe it or not She and I are dating. I’ve known her for a couple of years, but we’ve been seeing each other for a month and a half now. She’s real nice, doesn’t complain much, and if I can figure out how to do it, I may get her interested in ham radio. That may be dangerous, because she likes to spend money, which is one of many things we have in common. She’s legally blind, among other numerous health issues, but we get along fine. She lives with her Mom, and I’ve been over there staying a few nights. I figure you’ll still call me a nestling, but as to other things you’ll say about me, well, I’m not into those.

Well, that’s all I can think of to harass you about. The cable is going to be set up Wednesday morning, so that’s when Echo Link will go down. Hopefully it will be back up quickly.

Have a good day, and don’t work too hard.

GO CATS!
Kevin Minor, Lexington, KY

About HFIE-2014 for US Amateur and Government Stations

High Frequency Interoperability Exercise (HFIE) is a readiness exercise event to test radio stations and radio operator practice for HF interoperability communications using Automatic Link Establishment (ALE).

The exercise prepares radio operators to more efficiently handle essential Emergency Communications (EMCOMM) and respond to the needs of disaster relief. Participating radio operators use this exercise to gain more experience in setting up and operating stations, and to achieve technical proficiency in communicating via HF radio using ALE.

HFIE is a free and open semi-annual exercise, coordinated by the HFLINK organization and the Global ALE High Frequency Network (HFN).

Exercise operating guide – http://hflink.net/hfie2014/HFIE_2014_Guidelines_for_US_Amateur_and_Government_Stations_v10.pdf

July is Amateur Radio Recognition and Appreciation Month

July is Amateur Radio Recognition and Appreciation Month

North Carolina Governor Pat McCrory has proclaimed July as “Amateur Radio Recognition and Appreciation Month”

The ARRL report that among other things, the governor recognized the ARRL’s Centennial this year.

Read the resolution

Topic: 193 Message: 193

I know it's confusing. It is a difference in terms, of which we have many. For example you are only mobile if you are moving; if you are in a parked car you are "portable". If you are walking down the sidewalk with your portable 2-Meter rig talking to your buddies you are "mobile". If you are at you buddy's shack using his your callsign on his radio, you are "portable". The F.C.C. used to make us sign all that stuff with our call (like the W1AW/x stations are doing)

Introducing the Vacuum Transistor: A Device Made of Nothing:-
Move over traditional silicon. There’s a new vacuum-channel transistor that could be replacing you. Jin-Woo Han and Meyya Meyyappan, researchers at the NASA Ames Research Center, explain how they married vacuum-tube technology and modern semiconductor-fabrication techniques to create this hybrid. It can also be made as small and as cheap as any solid-state device, which gives it a competitive edge. Although Han and Meyyappan say their research is still at an early stage, their prototype could operate at 460 gigahertz—roughly 10 times as fast as the best silicon transistor can manage.

195. CC&H RESTRICTIONS

Ham Antennas in locations with CC&R restrictions HR.4969

There is a bill before the House of Representatives called the Amateur Radio Parity Act of 2014.

If passed, it will require that homeowners associations and other locations with antenna restrictions to accomodate ham radio operators with "Reasonable antennas" and lift those antenna restrictions. We all need to pay close attention to this bill! For more information and to sign the petition, go to

http://bit.ly/hr4969

HR.4969 would require the FCC, within 120 days of the Bill’s passage, to amend the Part 97 Amateur Service rules to apply PRB-1coverage to include homeowners’ association regulations and deed restrictions, often referred to as “covenants, conditions, and restrictions” (CC&Rs). PRB-1 states that local governments cannot preclude Amateur Radio communications; they must “reasonably accommodate” amateur operations, and the state and local regulations must be the minimum practicable regulation to accomplish a legitimate governmental interest.
Presently, PRB-1 only applies to state and local zoning laws and ordinances. Since PRB-1 was enacted, the FCC has said several times that it would prefer to have some guidance from Congress before extending the policy to private land-use regulations. HR.4969 will provide that guidance, and give PRB-1 the force of Federal law.
Radio amateurs, while providing a valuable and necessary service to their communities, are frequently and increasingly precluded from installing necessary equipment (antennas, coax, etc) by unreasonable private land-use restrictions, including restrictive CC&R covenants. The net effect of HR.4969 passage will be to suppress those unreasonable restrictions and allow licensed amateurs to install reasonable equipment for practicing our hobby and having the means to serve our communities.

If you have not played in the 13 Colonies event before, go to

13colonies.info

Each state has been asked to have ONE QRP station handing
out 13 Colony QSOs who concentrates on QRP.

I am that station for GA. I will be K2G/QRP quite a lot this week.
I see that only NC and NJ in addition to GA have a listed QRP station.

None the less, if you work me and would like a QRP confirmation,
send your request with an SASE to NF4GA - the QSL manager group.

I'll be announcing on the usual QRP alerting site of http://qrpspots.com/
as well as DX SUMMITS. In fact,
you can find all the 13 Colony stations by going to the search page on DX SUMMITS
http://www.dxsummit.fi/Search.aspx
and putting in K2* which will show you where all the 13C ops are operating.

A nice certificate is available for working the 13C stations:
http://13colonies.info/CertRequests.htm

Frankly, I have had no problem making the clean sweep the
past 3 years at the QRP level. However, I
tend to do it very early in the week of July 4. QRM is lower so
if you can, get 'em early. It starts at 9AM EDT
on July 1 (Tuesday).

Lots of fun.

The story of the link system of repeaters in Eastern Kentucky:

*Ken Robinson K4KBR always wanted to see repeaters where they could link when needed for emergencies, making for much better VHF network for communicating in these mountains. Also be able to make is easy for use of handy talkies to be used as we are doing now in places we never could before. He put together a hub system from the Paintsville Repeater using UHF for linking as required. He had Curtis Meade KY4CM to help on the sites when he was doing all of this testing and trying to get it all working Each repeater can be turned on/off if not needed in the link, NOAA weather watches and warning can be announced over the system, with direct communications with the hams at Jackson National Weather Service. I would like to thank the repeater owners that have put their repeaters on the system and everyone’s help to keep them going. We keep trying to improve all of the time and make things better, Eastern KY never had it so good and we are lucky have the repeaters that we have today on the air and at the expense of the owners of them, giving their time too so we can have a

better system. It is free for all amateurs to use and please do so all that you want too. It is there for your use and not just for emergency work, but we know that you will use it wisely.*

73,
Fred Jones, Ken Robinson, Curtis Meade and Ross Leedy.

The September issue of our newsletter is now available for reading or download at http://www.naqcc.info/newsletter_current.pdf .

This issue is a record setting 41 pages of great content. Highlights include…

- A review of the MFJ Cub by WB3T.
- Member Spotlight on KU4A.
- Interesting reports from all 5 of our local chapters including lots of pictures. (Yes, that’s 5 because we have a new one!)
- Great Member Submissions.
- Ham Quips, Sprint reports, Challenge reports, QRS Net reports.
- And much more!

Enjoy!

201. [HFpack] Solar Cycle 24 In Its Last Big Peak Right Now

Yahoo group: winparc
Date: 2014-09-13 10:30:38 UTC
From: Peter Clough
Topic: 201 Message: 201

Solar Cycle Peaking Now,
Next Cycle Starts in 5 Years With Less Sunspots

Solar Cycle 24 In Its Last Big Peak Right Now

September 2014 - The present solar cycle is in its second and strongest peak right now. The present levels of moderately high solar activity with occasional solar flares are expected to continue through 2014 and then subside dramatically over the next 4 years. Then we should see the solar minimum for 3 years. An upswing of the next solar maximum, Cycle 25, is predicted to peak between year 2022 and 2025, but be somewhat less potent than our present cycle. The following chart shows our present position in the cycles.

(Prediction Source: Bonnie Crystal KQ6XA, HFLINK)

Hi Pete,

Is that Chuck?

BTW, I can't remember when I knew Jeff Judy but I'm pretty sure I lived in O'Donnell Hall then. He was a great guy and became a pilot for UPS. He had a Swan 500 radio and his own apartment which means he was "RICH" ! I lived in my Mom's basement and had a BC-779 RX and a Johnson Valiant TX; they were pretty cool, lots of fun, old, very heavy and "CHEAP"! Another guy, Scotty McFadden from London was a friend of Jeff; Scotty flew helicopters in the National Guard, became a ski instructor in Colorado and passed away several years ago from cancer; he was still a young guy.

Comedian Tim Allen = Radio Amateur (For Real)

In a particularly delicious twist of Life Imitating Art, comedian Tim Allen, star of the ABC hit television series, "Last Man Standing," has earned his Amateur Radio ticket, KK6OTD. Tim joins nearly 2 dozen show production and crew members who have become Amateurs in real life as a result of regular exposure to authentic equipment on the stage set and devilishly hilarious ham radio story lines that find their way into the script by brilliant writers.
Amateurs who are already loyal fans of the show are delighted to welcome Tim into the ranks of the Amateur fraternity, where he joins a growing list of entertainers, heads of state, industry pioneers, and others of great notoriety.
Catch the 1st episode of the new season, this Friday night at 8pm.
Congratulations, Tim, and see you on the radio.

-Pete "The Greek" / NL7

Subject: Dale's Tales for October

Dale's Tales for October, 2014

Greetings everyone,

HB 4969 Progress Report: At the last writing of this column, ARRL and our supporters had garnered 28 Congressmen to co-sign the legislation. At that time, congress was in recess, so no one could sign the bill. Upon return from recess, ARRL continued to work for additional co-sponsors and now we have more that 55 who have signed on or agreed to do so.

To the members of the Great Lakes Division, I sincerely want to thank all of you for your continued effort to contact your congressman and ask for his support in passing HB 4969, the Amateur Radio Parity Act. As you are aware this bill is aimed at directing the PRB-1 style "reasonable accommodation" provisions for Amateur Radio antennas to include all types of land-use regulation, including areas with deed restrictions and restrictive covenants, hence the term "parity". "CC&Rs" (covenants, conditions and restrictions) are the prohibitions and limitations placed on properties by builders or home-owner associations (HOAs) which prevent licensed Amateurs from erecting even modest antennas. Details and updates are posted at

http://www.arrl.org/hr-4969.

Great Lakes Division Vice Director, Tom Delaney W8WTD offers his monthly commentary:

A common theme I've heard at some of the ARRL forums I've attended this past month at hamfests is: what about the future of ham radio? Some think we're doing fine, since the number of hams is at an all-time high. Others worry on more practical terms --who's going to do what we are doing? And some of that is quite practical. Who will maintain the club repeaters, the club gear, and help instruct the next generation of hams? In fact, what about the clubs? How do we get more active members?

Food for thought, but there is also a lot being done. Every time these questions come up, there are also people there with some answers. Maybe not one big answer that covers everything, but simple solutions they are taking in their communities to help recruit and train and mentor new hams.

For instance, in Cleveland, there were several answers to the question of how to interest young people who already have so many distractions, and who are tied to their cell phones and would never imagine themselves talking on radios. One team is working with the STEM (Science, Technology, Engineering, Mathematics) programs in their local schools. But other people suggested that the interest in Robotics is another way to generate interest. And yet another person suggested that MESH could interest students who already know about WiFi, because it would open up their possibilities for using a common technology they already know about.

Some of the other questions are not so easily answered. But if we keep talking about it, and sharing ideas, on the air, in print, and in person, maybe we'll find some good solutions.

Ham radio is still vital. The activities of the Centennial year are certainly showing that. Lots of great participation in the W1AW portable operations, and all the other things going on. And a lot of thought being given to how to interest the next generation. Each one of us has something we can do. Take a few minutes, and figure out what your contribution will be!

73, Tom W8WTD, Vice Director, Great Lakes Division

Tom's observations should be considered by all of us, as we look to Amateur Radio's future. Thirty years ago, for example, autopatches played an important part of ham radio emergency preparedness. We all counted on them and we all used them. Today, it is rare to hear someone using a patch because technology has moved us to the use of cellphones.

Time and technology have brought change and in many ways ham radio ops have played a vital part in advancing that technology. We move ahead. We must continue that effort and we need to see that our youth are offered the opportunity to know what ham radio can offer as they will soon be leading the technology push. How do we do this? How do we reach our youngsters? Admittedly, the most successful ham programs seem to be in our public schools and those flourish where an instructor who holds a ham license is directly involved with the students. From a practical sense, that is not always possible and in many cases a licensed ham from the community serves as a counselor and mentor to the school's program. Other truly viable programs are those dedicated to ham radio youth, again with a truly dedicated sponsoring ham. Either way, serious commitment is required and it appears few of us are prepared to take those steps.

So what is the solution? We talk about it - a great deal. We have heard our young hams tell us what needs to happen. We really know what we need to do.

The application period for ARRL Foundation scholarships opened October 1st. Here is an opportunity to assist students that could use help in paying for their college education. Please pass the word that the ARRL Foundation scholarship program is available to help out and encourage students to apply. Details at:
http://www.arrl.org/news/the-arrl-foundation-invites-scholarship-applications-for-2015-16-academic-year

Here is the current ARRL Hamfest Schedule for the Great Lakes Division:

Oct 4 - 'Vette City Hamfest, Bowling Green, KY -- QSL Checking -- WA8EFK, KY4Z
Oct 18 - Muskegon Color Tour Hamfest, Muskegon, MI -- WB8R
Oct 19 - Conneaut ARC Hamfest, Conneaut, OH - N8SY
Oct 19 - Kalamazoo Hamfest, Kalamazoo, MI -- QSL Checking - WB8R
Oct 25 - Hazard KY Hamfest - Hazard, KY -- KY4Z
Oct 26 - USECA Hamfest - Madison Heights, MI -- WB8R
Nov 1 - Grant County - Georgetown, OH
Nov 2 - Massillon ARC Hamfest, Massillon, OH -- QSL Checking - N8SY
Dec 6 - Fulton County Winterfest, Delta, OH
Dec 12 - Lanse Creuse, Harrison Twp, MI - WB8R

A note about hamfest attendance by your ARRL elected officials. We strive for insuring that the ARRL is properly represented at every ARRL Sanctioned Hamfest. Conflicts can arise, such as hamfests which might occur on the same day. It is always a good idea for your hamfest chairman to contact the Section Manager, Vice-Director or Director early in the planning stages to insure his attendance at the activity. This will allow time to prepare for alternate representation in the event of time conflicts.

73 all, see you on the bands.

Dale Williams WA8EFK
Director, Great Lakes Division

Subject: [kyham] Introduction to Amateur Radio Class Scheduled in Lexington

Introduction to Amateur Radio
An Introduction to Amateur Radio class will begin Wednesday, February 4, 2015 in classroom "A" of the Red Cross building, 1450 Newtown Pike, Lexington, Kentucky. The class will meet each Wednesday evening at 7:00 PM.

The purpose of this class is to teach how to earn your Technician Class amateur radio license, which is the beginning level needed to get on the air. With this license and basic radio equipment an operator can communicate locally and internationally. The only cost for the class is you will need to purchase a “License Manual,” otherwise the class is free. This is a service provided by the Bluegrass Amateur Radio Society in cooperation with the Bluegrass Chapter of the American Red Cross.

The FCC Technician License course covers basic FCC regulations, operating practices, and electronics theory, with a focus on VHF and UHF applications. Morse code is not required for this license, but remains a popular mode of communicating among Hams. With a Technician Class license, you will have all ham radio privileges the FCC allows to operate above 30 MHz (attend the class and you will understand this better). Many Technician Class licensees enjoy using small hand-held transceivers to stay in touch with other hams in their area. Technicians may operate FM voice, digital packet (computers), amateur television, single-sideband voice. and several other interesting modes. You can even make international radio contacts via satellites, using relatively simple station equipment. Technician licensees now also have additional privileges on certain HF frequencies on the 80-, 40- and 15-meter bands (again, attend the class and you will understand this better) using CW, and on the 10-meter band using CW, voice, and digital modes.

For more information contact Bobby Rolph at (659) 967-9562 or check out our web site at www.BluegrassARS.org. There is no age limit, all ages are welcome.

SPECIAL WEATHER SPOTTING/REPORTING TRAINING PROGRAM
There will be a special weather spotting training program, open to any licensed
amateur radio operator and the general public, Monday, March 2 at 7:00 PM. The
location will be Meeting Room "B" of the Red Cross Building, 1450 Newtown Pike,
Lexington.KY The program will be presented by a representative of the National
Weather Service, Louisville, Kentucky. This will be an Advanced Training Session
for spotting, identifying, and reporting severe weather . . . training
specifically developed for those who have attended training sessions previously,
and by those persons with little meteorological experience. This training
session will be open for any Amateur Radio operator with an interest in learning
about providing public service communications during times of severe weather.
The general public is also welcome to attend because much of the details will be
useful for everyone to prepare for and understand what to do during times of
severe weather. Certificates of successful completion of the course will be
presented to attendees by the Weather Service representative. For information
concerning the meeting, you may contact either Joseph "Smokey" Wallace/KE6IVK
859-402-8208, Brad James/WA4HBM (859-293-5893), or Bill DeVore/N4DIT
(859-273-8345).This training session is sponsored by Bluegrass ARS, American Red
Cross Bluegrass Chapter, and National Weather Service, Louisville, Lexington
EOC. Please go to http://www.nws.noaa.gov/os/brochures/SGJune6-11.pdf.
And review this material. Please announce and attend. Extra parking will be
on the south side and behind the Red Cross building
KE6IVK
Smokey

212. Fwd: W4DXCC and Ham Radio Bootcamp Update

Hello Club Officials and Friends, The W4DXCC Convention will be here before we know it. I would ask that you please forward this announcement onto c

[image: W4DXCC Header]

Hello Club Officials and Friends,

The W4DXCC Convention will be here before we know it. I would ask that you please forward this announcement onto club members and friends. Thank You in advance for your help getting the word out!

The W4DXCC convention is coming together nicely. The team has been working very hard to get everything just right for your visit September 25th and 26th.

If you have not already made your hotel reservations or called Rosie for convention/banquet tickets then it is time to get that done. The Mainstay reports rooms are going fast and so are the Banquet tickets. So please call now. *(865) 428-8350*
<https://go.madmimi.com/redirects/1437960328-37609ccc50de4a01a5b186a8553f5b4e-8fd1c87?pa=31927084018>

This year besides all the great presenters and presentations we have an Elmering session all day Friday called *Ham Radio Bootcamp*
<https://go.madmimi.com/redirects/1437960328-8cb988d9af0b830d367a31d7ebb46632-8fd1c87?pa=31927084018>.
If you were lucky enough to have an Elmer, you know, someone who helped you learn what and how to become a knowledgeable ham, then you know having an Elmer is invaluable. With Ham Radio Bootcamp, W4DXCC has put together a team of Elmer's who can help the new and experienced ham learn more about setting up and operating HF radio.

Friday Ham Radio Bootcamp doors open at 800 for registeration and class starts at 830. We start out very rudimentary and finish strong with stuff every ham should know. This will surly interest the experianced ham and is a must attend for the new ham.

In the lobby just outside of the conferance hall are amateur radio equipment vendors that are there to answer your questions. Take your time asking questions and twist the knobs on your favorite equipment.

Checkout the *W4DXCC.com website*
<https://go.madmimi.com/redirects/1437960328-5873dcfa541f3040c1310ed28e257643-8fd1c87?pa=31927084018>

If you have any questions you would like to ask via email send your email here info@... <javascript:_e(%7B%7D,'cvml','info@...');>, we will do our best to answer them.

I hope to see you, your friends and the family this year. All the best 73

Dave Anderson, K4SV

216. ARRL Dues Increase 1/1/16

Yahoo group: winparc
Date: 2015-12-15 03:05:46 UTC
From: Peter Clough
Topic: 216 Message: 216

Arrl notice

Can you put out a last call for ARRL Dues Renewals to save money or for new members to join before year's end as the dues increase by $10 per year on 1/1/2016? Thanks!

SEC & STM, NCS, others... this should be announced on all KY Nets this next two weeks as well. Thanks!

73,

Alan, KY1O

I have two desks which would be great for a Ham station: One is a DIY consisting of a 6 1/2’ X 32 inch door (lightweight, smooth surface) which would make a great desk top for a corner of a basement, garage, etc. Cost: FREE to the first person to pick it up and take it away.
The second desk is a 5’ X 30” cherry finish desk with drawers on each side, and a drop-down sliding shelf for keyboard. It has a few scratches on the front edge from use, but the surface looks good. Cost: $50, you come and pick it up. Contact me at "ham @ w4ish.net http://w4ish.net/ “ (no spaces) if you are interested.

Bill
